Management	<p>Management was readily observed keeping workers focused and guided. Management made effective decsions and moved resources/workers when necessary. Management jumped in and worked well in areas that needed extra effort. Management listened to the needs of their crews and worked to resolve those problems quickly and effectively. Management set effective goals and backward designed manageable timetables with clear objectives for each stage of completion</p>	<p>Management was observed keeping workers focused and guided. Management jumped in to work in areas that needed extra effort. Management worked to resolve problems quickly. Management was somewhat effective at setting goals and designing manageable timetables and objectives.</p>	<p>Management struggled keeping workers focused and guided. Management needed external reinforcement to resolve labor/production issues. Management sometimes worked in departments that needed extra effort. Management set goals but objectives weren't always understood by the crews.</p>
