

Daisy: So, we are the team leaders. We are in charge of organizing the entire of class. We are in charge of making sure actually it is done.

Noelle: We are making sure everyone does their work.

Levi: Our job in sanctuary project is to research everything that all the other teams need to know in order to do their jobs.

Linnea: We are supposed to eventually provide the class all the information they need so that they can take the end of the quarter test.

Hannah: I am manager. Help manage everything. And Delila is going to help us, write lyrics. Simon and Stefano and me are in charge of making the music. And Jaron is helping with lyrics and also music stuffs. And Sharon is also helping with music stuffs.

Jaron: All right. So, we are finishing up our original song here. We are working on logic pro. You can see here. We get a bunch of sound here. We got violas, violin, midi. We got vocal part which we are trying to fix at the moment.

Sherry: I am in the art group and one of my main job is painting. And i am doing part of the comic book too.

Peter: My job is to make sure that everybody in our group do their jobs and do those as efficiently as possible.

Meier: I am doing comic book and part of the painting.

Hayden: I am the manager of the website.

Jack: So we did the basic structure and put each category in the website.

Jared: We are building it and we are doing some other stuff like logo design, physics charts, furniture, people and animals.

Mireya: So my job for the Sanctuary project is taking and viding all the measurement like scaling down that we can start building. And place all the furniture and the walls on the actual building. And what I found most cool is that like everything, like all the measurement, are all perfect. Because when you put it together, like everything lines up so perfectly that I can actually center it at the center of the board is so easy. It is really simple and it is not hard at all. And it is cool that how God originally intended to be. So that everything is perfect but also very easy to put together.

Linnea: Ok, here is the Sanctuary. We start at the entrance which is facing east. And the first thing you come upon with is altar of burnt offering. There is no ramp mention in the Bible but there is specific imply that there is no steps so that they will not show their nakedness. And finds out there is ramp leading up to it. After you go to the altar of burnt offering, the next piece of furniture is the laver. This the place where the priest wash before and after entering the tabernacle. After entering the tabernacle, only the priest enters the Holy Place every sunrise and the sunset. Once in the holy place, there are three items of furniture. There is the Candlesticks, the table of show bread, and the aLtarot incense. This is the most holy place that is a ten wide, ten long and ten high cube. This is only entered by the priest on the day of atonement.

Linnea: The most difficult part I think is trying to figure out what deg wants from us. As we are trying to scramble through all the information together.

Stefano: So the hardest part of the project has been to get everyone here together, when you need them, where you need them, and to get stuff done.

Mireya: Personally, for me the hardest part I guess was working with others.

Daisy: For me the hardest part is figuring out how to show a face of leader I front of everyone.

Linnea: the thing is there are so many different ways to interpret a lot of the information that we are given. And there are so many resources that say even contradicting thing. Trying to figure out both he is looking for and what probable to be real is the most difficult part.

Mireya: There was thing that I knew but they didn't. When they continuously me asking the same questions or try doing my job, it is frustrating.

Daisy: When you don't know what's happening yourself, everyone just comes to you and ask questions. You don't have the answer right away.

Stefano : Because sometimes it is easily to get distractible. And we want to do our own things instead of our tasks to do.

Hannah: From this project, I basically learn how to use Logic Pro.

Noelle: We learned how to deal with many different people, how to organize people is not as easy as it is seen.

Peter: From these days, we have been drawing a lot of drawings. We have learned is that we have to learn to fit each other. We have to learn how to be patient with those paintings.

Daisy: We also learned that even though you get set back on something does not mean that you should quit immediately or blow up because of that.

Hannah: We have to balance out different sounds, recording, and moving notes like different things.

Noelle : So we learn how to deal with people with different personalities, and kind of making everything runs.

Peter: Be patient with the people we draw together. Pieces are not easy to draw. It is pretty hard. But we get finish anyway. So probably it is the best result we can get.

Daisy: Even though we make a calendar at the beginning and set days that everything is to be due, that really never get followed on the first week. That is still doable. And that as long as you try to make up for that and keep working hard, it still going to happen.
