

ChristCo Official Video

Joey: "Whats up guys! Welcome to the first official video of ChristCo. So first things first, we're going to have a few of our members explain what their position is, and what they've been doing, and the process of it. Let's get to it!"

Miles: "Hello my name is Miles Potter, I am a staff member for both the art and website department on ChristCo. I work on general design and compatibility of the website as well as a collaborator for both art and other art projects. I've been on this team ever since it began, back in of february 2020 in fact- and I've learned a lot since I've started my journey. I've been blessed to work under amazing management and to work with group members and leaders who have been so great working with, and I'm glad I can call them co-workers. My main reason for joining ChristCo is because I have a desire to help others and to put my skills into a good cause, and I hope it shows through my work."

Ellen: "Hi my name is Ellen. I am in the music group and the art group. For the art group I drew some pictures. Also took a lot of different pictures about the buildings, gardens, and the rivers. So far the music group, we are doing the original song, and cover song."

Edgar: "Hi guys, my name is Edgar and I'm the leader for music and video group. One of my main jobs is to make sure that everybody is doing their job, and make sure that everybody's clear with everything. If they have questions, I answer them, and so I also do the original songs, only instruments. I partner with Hayden, and also were doing one more song- an original song, from Marya. So we're going to have two original songs and since they're gonna be two original songs, we are going to have two music videos. And so from the music and video group we have already some interviews, we already have this plan animation, we have the animation planned out, we just need to start on it and yeah I think that's it from the music and video group. So thank you, and I'll see you guys later!"

Damaris: "Hi! My name is Damaris Flores and I'll be explaining to you a little bit about what my job is within the ChristCo company. I am the leader of fabrications, meaning I check in on people, make sure that things are getting turned in, that our process is running smoothly. Fabrications as a team- we are in charge of making merchandise, that be your hoodies, your sweatshirts, your socks, your logos, t-shirts, any of that kind of fun stuff. We are working with our art group to help design our logos any pictures that we have on our t-shirts, so that all of our work is 100% ours and nobody else's. We're currently in the process of actually making a couple of board games and card games so that stuff will be out pretty soon. Make sure to contact us if you have any questions, bye have a nice day!"

Peter: "So my name is Peter Huang and in religion 4 project, I am part of the group of fabrications, and the music and art. So what I did for this period is like finding some material for the people who work on some art work, and giving some ideas about how these things work, like how and what they can do, like what they can put the stuff in, like something like that."
