The Many Uses of Watermelon Seeds: A Study in Applied Horticulture

Blah, blah, I'm making this stuff up. The references or guidelines in the table of contents should match whatever is here. This is the body of your work. This is where the core of your paper would be. But in this example I'm going to fill it with nonsense for the most part just to show you formatting. So you can probably stop reading now.

Blah, blah, I'm making this stuff up. The references or guidelines in the table of contents should match whatever is here. This is the body of your work. This is where the core of your paper would be. But in this example I'm going to fill it with nonsense for the most part just to show you formatting. So you can probably stop reading now.

remember this is for a paper with a title page. some teachers want the basic standard format which means no title page and you start 1/3 down the page. look up the format
